

# SENTRY FRONT DOORS

---

# Sentry Front Door Range

Jason Windows products have been widely used in WA homes for over 60 years and the company continues to be the market leader in product design, strength, security and customer service. We understand that a new home or home renovation is a major investment and we are committed to providing the highest quality solutions for West Australians at an affordable price.

## QUALITY

Jason Windows has built its reputation on perfecting and crafting quality windows, doors and security screens specifically designed for the Western Australian market. Our attention to detail, in-house testing facility and internal processes ensure we produce quality products and services that continue to perform and stand the test of time.

## SERVICE

Quality service goes hand in hand with a quality product and we are committed to providing helpful, informative and attentive customer service. From the time of your new home hand-over or completed renovation, Jason Windows will handle all warranty maintenance enquires directly with you and continue to manage all maintenance and servicing needs outside of the warranty, for the life of your home.

**Energy-conscious design.** The Jason premium seals reduce air leakage and produce an excellent air conditioning rating ensuring maximum efficiency when heating or cooling your home. To improve energy efficiency further, consider Low-E energy efficient glass to reduce the transfer of heat or cold through the glass. Your home will stay warmer in the winter and cooler in the summer. Low-E glass is like insulation panels for your home.

**Stylish yet secure.** All Jason Sentry Doors come with a multipoint locking system and being aluminium, will not splinter or break when forced.

**BAL Rated.** All Jason Sentry Doors meet the BAL29 bush fire rating, including the timber look range of colours.

SINGLE LITE SENTRY DOOR IN NIGHT SKY

# Specifications, Couplers, and Midrails

## Specifications

Frame Profile (mm)	76W x 30H
Door Height (mm)	Min: 2040
	Max: 2445
Door Width (mm)	Min: 820
	Max: 1270
Maximum Panel Width (mm)	1200
Maximum Panel Weight - Single Glazing	50kg
Maximum Panel Weight - Double Glazing	100kg
Maximum Water Rating	150pa
Maximum Wind Rating (Single)	800kpa
Maximum Glass Thickness - Single Glazing (mm)	7
Maximum Glass Thickness - Double Glazing (mm)	18
Maximum Bush Fire Rating	BAL29
Lowest U-Value Single Glazing	4.5
Lowest SHGC - Single Glazing	0.28

## Couplers

Combine and neatly align your door in a window-to-door configuration creating your own unique look.

Choose from:

- 180 degree straight coupler,
- 135 degree bay coupler, or
- 90 degree corner coupler
- Door to window hi-lite coupler

Door to fixed window coupler

## Midrails

Choose from multiple horizontal or vertical midrail options in either single or double door configurations.

More midrail configurations are shown on pages 4-5.

5 Lite horizontal midrails  
Western Red Cedar  
Timber Look

6 Lite horizontal midrails  
Pearl White

3 Lite vertical midrails  
Jarrah Rose Mahogany  
Timber Look

# Configurations

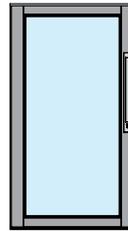

Making the right impression is as important as making a great entrance, it sets the tone for everything else. The Jason Sentry Door range has that solid, reassuring feel, with a watertight fit. Available in the following configurations, with your choice of hi-lites, sidelites, and midrails.

## Glazing Options

Australian Standards & Building Regulations will determine some glass choices within your home. All new homes or new renovations need to comply with these regulations.

As a general guide, you must use Grade A Safety Glass in:

- All glass doors
- Bathrooms (for all areas up to 2m high)
- Door side panels (if less than 300mm away from the door and positioned 1200mm or less above the floor)
- Areas that can be mistaken for openings such as full height glass
- Low level glass if larger than 1.2m. (If less than 1.2m a minimum glass thickness of 5mm annealed is required)

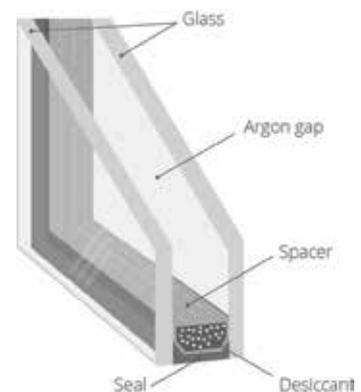

Jason Windows supply safety glass as standard. Our upgrade options include:

UPGRADE	APPLICATION
Laminated (Safety Glass)	Areas requiring special performance such as sound reduction, energy efficiency and additional security Areas most prone to injury from human impact such as bathrooms, splashbacks, doors and full-length windows
Toned (Tinted Glass)	Useful for reducing the sun's impact on unshaded doors
Low-E	Areas where greater solar and thermal control is required. Helpful in reducing a new home's Energy Efficiency Rating and a cost-effective alternative to double glazing.
Double Glazing	Areas where more control of heat gain and loss through the glass is required

## Double Glazing

Double glazing consists of two panels of glass in a sealed unit separated by a layer of air or argon gas. The Jason Double Glazing Range uses argon gas to create a more effective insulation break. This greatly reduces both heat flow and thermal conductivity through the door. The thermal benefits of double glazing make it ideal for rooms where greater control of heat gain or loss is required.

## GLASS ADVICE

Selecting the right glass type for your new home or renovation project can have a big impact on your comfort and energy costs. Jason Windows can offer you free expert glass advice to suit your home. This service is available from our Welshpool and Bunbury showrooms. Check our website for opening times.

# Glass Appearance

**CLEAR**

Best suited for clarity and low distortion. Use in areas you want to flood with natural light or enjoy a clear view. For north facing elevations, use to heat up north facing rooms in the winter.

**NEUTRAL**

Neutral glass is lightly toned and only available in Low E. The light tone is often preferred for a softer natural light effect.

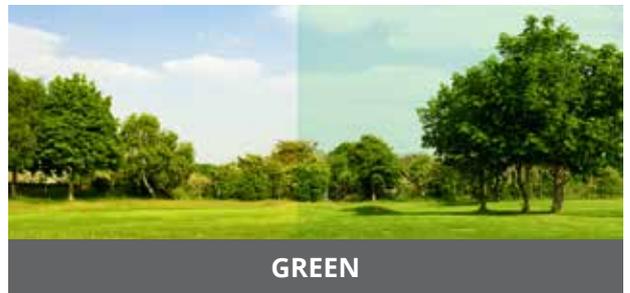

THREE LITE SENTRY DOOR IN CHARCOAL LUSTRE

**GREY**

Commonly selected to achieve a darker elevation and to reduce the amount of light coming into the home. Offers good reduction levels of UV light. Pairing a toned glass with the insulation properties of Low E glass will provide greater energy efficiency than Low E alone.

**GREEN**

Offering a small reduction in light and UV light, the green toned glass can provide a softer natural light effect. Pairing a toned glass with the insulation properties of Low E glass will provide greater energy efficiency than Low E alone.

**TRANSLUCENT**

With a smooth milky finish, Translucent glass provides a high level of privacy and is often chosen for front entry doors. Can also be paired with a toned glass.

# Handles

**One key, many locks.** Choose from a selection of stylish handle options which can be keyed alike\* to all other Jason doors in your home including security doors.

STANDARD RANGE

The Lockwood Palladium 4 Point - Summit in silver is supplied as default. If you would like another handle from the range, ensure you specify at pre-start or time of order.

FOUR LITE SENTRY DOOR IN CHARCOAL LUSTRE

HANDLES MARKED WITH A \* CANNOT BE KEYED ALIKE

## Colours

Jason Sentry Front Doors are available in seven popular colours from our standard colour range:

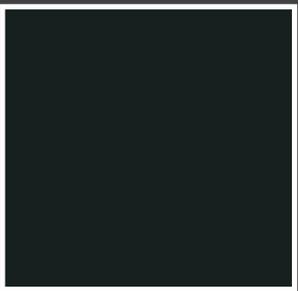

WHITE LUSTRE

SILVER LUSTRE

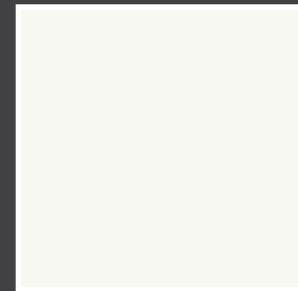

CHARCOAL LUSTRE

NIGHT SKY

STORM FRONT

PEARL WHITE

ANOTEC DARK GREY

It is always recommended to choose your colour from an actual sample as variations can occur between digital monitors and printers.

Custom colours are available however extended lead times and additional charges apply.

## Timber Look Finish

Although a timber front door looks great, they require the maintenance and upkeep that comes with natural wood and the West Australian climate. The Jason Timber Look finish gives the natural look of timber with the durability and strength of aluminium, plus minimal maintenance and up keep:

- No re-painting or varnishing
- No warping
- Won't splinter or break when forced

The Timber Look finish is only available in the Sentry Front Door range.

### JARRAH ROSE MAHOGANY

If you enjoy robust dark tones and want to make an amazing entry statement, this is the option for you. Contrasting with light brick and render you can create a striking sophisticated look. Pairing with dark colours allows the burgundy and deep brown tones to blend, exuding classic luxury. Did you know that Jarrah was originally known as Swan River Mahogany due to its location source.

### CHARCOAL EBONY

Make a striking contemporary statement with this finish. A real wow factor that is sophisticated and plays on Shou Sugi Ban (or Yakisugi) an ancient Japanese exterior siding technique that preserves wood by charring. The use of dark wood features is a popular trend showcased on shows such as Grand Designs UK and Australia.

### WESTERN RED CEDAR

Add warmth to a contemporary style house. Cedar is the colour most architects use to add contrast and create warmth through its mid range tones. Now you can enjoy the warm lustre without any weathering, maintenance or treatment. This colour is the perfect match to the Cubist and Mid Century revival homes and architecture which are trending at the moment.

## Security Screens

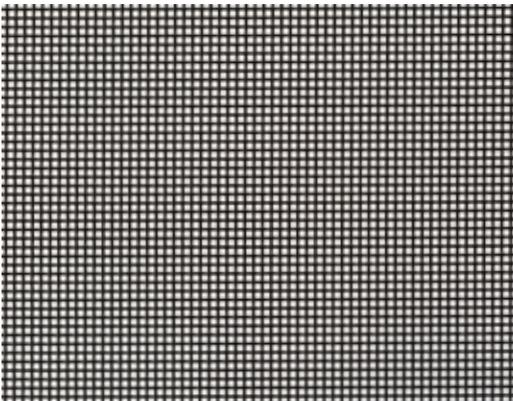

Not all door frames are designed and manufactured in the same way. Jason's range of security doors have been designed to fit Jason frames seamlessly. There is no need for unsightly modifications other security screens often create when attempting to fit non-Jason screens to Jason frames.

Jason security doors offer great benefits:

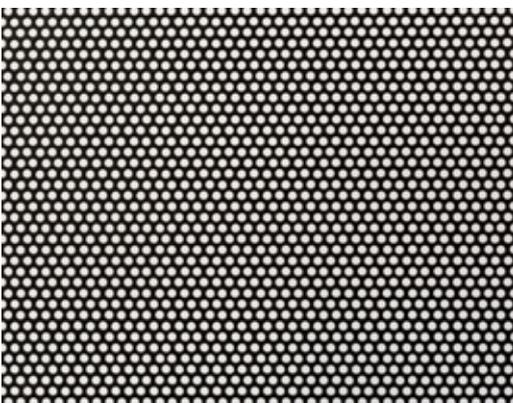

- **Triple lock, one flick system.** With one flick, three locking points are activated on the door providing extra protection from the door being wrenched at the top or bottom by an intruder. Jason security doors can be keyed alike to other Jason doors in your home.
- **BAL Fire Rated.** The Jason range of 316 stainless steel and perforated aluminium both meet bush fire ratings up to and including BAL29.
- **Stylish and sleek.** Designed to ensure the style of your home won't be compromised. Our fixings are concealed and not visible on the outer screen, offering a sleek look to blend in with the style of your home.

Choose from:

- 316 Marine Grade Stainless Steel Woven Mesh. Ultimate security, offering the highest level of corrosion resistance available.
- Perforated Marine Grade Aluminium. Cost-effective security option.
